

VX Model

Electric motor or engine driven
single fan vertical cooler for on and
off skid applications

VX Model Specifications:

- Adaptable to field compression units in the range of 5-1500HP.
- Fan diameters ranging from 24" to 108".
- Internal or external electric motor driven and engine driven designs.

VX Model Summary:

- Vertical fan and sections with horizontal air discharge allows for a wide variety of field applications.
- Convenient accessibility to all drive components including the drives, bearings, and fans.
- Adaptable to field compression units; wellhead cooling, lube oil cooling, and other applications.
- Wide range of design arrangements in single or multiple pass configurations based on customer/equipment needs.
- Add on options for this cooler include items such as: hail guards, bug screens, fully enclosed fork-lift slots, and auxiliary louvers.
- Supplied with top-of-the-line bearings, fans, and shafts to minimize operational costs and improve run time.
- Structure offered with customer preferred paint or galvanizing.
